## Press information

### Baking with Westmark

Westmark is to extend their baking product range with a rolling pin series and a classic measuring cup.

The Westmark bakery, with its multitude of baking tins and an array of patisserie tools such as spatulas, piping nozzles, decorating pens, dough scoops etc. summarises the concept of product utility through clear, informative and yet emotionally attractive packaging designs.

These baking articles are now supplemented by 3 rolling pins and a measuring cup. These are products which extend our concept thanks to their form and language of colour.

This beautiful, functional series includes:

Stipple roller in order to prevent bubble formation during baking.

Grid roller for quick and simple formation of an even grid, e.g. for Linzer torte and covered tray bakes

Pastry strip cutter with 7 wheels for uniform, wavy cutting of strips made from pastry or fondant.

With the measuring cup, a popular classic is now available made from tinplate which again picks up on the appealing Westmark bakery image through its design.

### Westmark GmbH

Westmark is a medium-sized company based in Elspe in the Sauerland, in the south-western part of the German state of North Rhine Westphalia. Westmark offers a large range of kitchen aids and useful household goods for kitchens and caterers. Its products are distributed by specialist outlets as well as more broadly.

A large proportion of the range is produced within the company itself; which is just what you'd expect from products „Made in Germany“. The company boasts more than 50 years of experience in the plastics and metal manufacturing sector.
