Press information

Topic: Wood with Westmark

Westmark is extending their product range with several high-quality wooden products.

Wooden products are once again enjoying popularity. In order to satisfy this spectrum of demand, too, Westmark will be presenting a high-quality wooden series at this year's Ambiente – comprising of fish slices, wooden spoons, spoons with hole and salad servers.

This series bears the appropriate name **'Woody'** and is produced from oiled beechwood.

Likewise made from beechwood is the mushroom-shaped nutcracker **'Holzi'**, which is available as 9 pieces suitably packaged in an attractive counter display.

Westmark GmbH

Westmark is a medium-sized company based in Elspe in the Sauerland, in the south-western part of the German state of North Rhine Westphalia. Westmark offers a large range of kitchen aids and useful household goods for kitchens and caterers. Its products are distributed by specialist outlets as well as more broadly.

A large proportion of the range is produced within the company itself; which is just what you'd expect from products „Made in Germany“. The company boasts more than 50 years of experience in the plastics and metal manufacturing sector.
